The bone marrow transplant (BMT) procedure substitutes faulty blood-forming cells with healthy ones. It is a specific kind of treatment for individuals having particular tumors or some other ailments. Stem cell transplantation, as it is also called, involves transplanting blood stem cells into the marrow to supplement the creation of fresh marrow and to form new blood cells. patients suffer from multiple illnesses, including sickle cell disease, and bone marrow transplants bring huge relief for such diseases.

Kenya's advancements in bone marrow transplantation include hospitals with expertise and experience in the field. Several institutions offer successful BMT procedures led by experienced hematologists and oncologists, meeting international standards.

Success rates for bone marrow transplants (BMT) vary based on factors like age, health, disease type, and stage. Consult a specialist to choose the right treatment and hospital. Excellent hospitals abroad, like those known for successfully treating hematological malignancies, offer advanced BMT units and experienced teams. Edhacare provides top hematologists and hospitals for BMT, with impressive success rates and state-of-the-art
