We are looking for a skilled software engineer who, along with our excellent software development team, will be responsible for working on projects that are currently being developed on by our company. Duties will include but are not limited to developing and directing software system validation and testing methods, as well as directing our software programming initiatives. You will also be working closely with clients and cross-functional departments to communicate project statuses and proposals. A bachelor's degree in computer science, software engineering, or another related field is required. You will also need at least five to seven years of software engineering or software development experience, preferably in a related field to be successful in this role.
