Address:

Hyderabad, Hyderabad

Price:

Check with seller

Activated alumina is a highly effective solution for water purification, efficiently removing contaminants like arsenic, fluoride, and selenium through adsorption. Its high surface area, regenerative ability, and resistance to water damage make it a superior choice for filtration systems. Maintaining the optimal pH range (5.0-6.0) ensures maximum performance. Choose Sorbchem India for premium-quality activated alumina at competitive prices. Contact us today!
