Dholakia Tobacco had a humble beginning in the year 2003 with the intentions of making it big. Having inherited a legacy of over 100 years the company already had a good start and a greater chance of making it global. They began developing a unique range of sensational smokeless Tobacco products; the credit for which goes solely to Mr Parag Dholakia of the Dholakia Family (5th Generation).

The Company has the location advantage from the very beginning. Sihor, in Gujarat is very popular for tobacco industry in India; Dholakia Tobacco has set up the business in this town which worked in their favor and was the first step to becoming popular. The other factors are the advanced technology and current product techniques along with the high capacity warehouses. Besides that, the organization has very high standards when it comes to quality of the product, being an ISO 9001-2015 certified company.

Dholakia Tobacco offers a wide range of snuff tobacco products including plain, menthol, scented and other aromas to the local and international market. Their special moist-snuff product is called snus. The factories have the ability to meet demand of any type of smokeless tobacco product.
