Address: Delhi, Delhi

Price: Free

Looking for a hosting solution that delivers unmatched performance and complete control? LeapSwitch offers a powerful dedicated Linux server platform in Delhi NCR, built to support businesses with demanding digital operations. Whether you're running enterprise applications, high-traffic websites, or critical databases, our infrastructure is engineered for speed, reliability, and scalability.

LeapSwitch provides dedicated servers powered by the latest Intel or AMD processors, with configurations offering up to 256 cores, 2TB RAM, and flexible storage options including HDDs, SSDs, and NVMe drives. All servers come with RAID protection for data safety and IPMI access for seamless remote management.

We deliver Tier 1 premium bandwidth to ensure consistent performance with low latency and minimal downtime. Our solutions are fully customizable—allowing you to choose your operating system, configure resources, and maintain full root access. This gives your team the power to build and scale without limitations.

Located in a top-tier data center in Delhi NCR, LeapSwitch's hosting environment is secured, monitored 24/7, and backed by technical support from industry professionals.

Choose a dedicated Linux server from LeapSwitch and get the stability, control, and performance your business needs to thrive in a competitive digital landscape.
