You can read this column if you are thinking "how to unlock iphone without passcode." There are two key ways to go about it. The first is to follow iCloud and Find My iPhone. However, the second option would be to use your Finder or iTunes. You can use your device to access the iCloud option and enter your Apple ID information to log in. Select the locked iPhone option from the list after clicking on Find iPhone. You may then continue by selecting the Erase iPhone option from the same menu. You can also receive their tutorial and use the iTunes or Finder options from the same window. You can obtain a thorough guide for this by clicking [the link mentioned above](#).
