Address:

New York, Airmont

Price:

\$ 54.00

PSM 2 Certification is a credible certification for experienced Scrum Masters who want to build on and demonstrate their Agile knowledge and skills. PSM 2 differs from entry-level certifications because the focus is on applying Scrum principles in practice within teams. More detail is given to advanced facilitation skills as well as the ability to lead and coach teams in a complex and changing context. This certification represents a high level of understanding of the concepts and values as defined within the Scrum Guide, and can be executed beyond the framework. PSM 2 is an opportunity for you to show you understand how to manage the dynamics inside your team, how to work with complex stakeholders, and how to influence change in your organization. Completing the PSM 2 level will set you up for a more advanced role within an Agile organization such as a senior Scrum Master role, Agile coach or project leader role. It also shows your credibility and career prospects have improved in Agile.
