If you are curious about 'Why Is My Airdrop Not Working' then there might be several reasons behind it. You must ensure that your Wi-Fi and Bluetooth are enabled because they are both very important while using the AirDrop feature on your device. Additionally, you should make sure that it is set with the "Everyone" or "Contacts Only" option, which you can find in the Control Center on both devices. However, if your issues persist, then you can try restarting your devices, and also you need to update your software, etc. Moreover, you can click the link here and get an accurate guide.
