If you are experiencing serious tooth pain, sensitivity, or infection, it may be a sign that you need to consider a root canal treatment. Instead of removing the tooth, this procedure helps save your natural tooth and relieve the pain effectively.

At our clinic, Dr. Aishwarya, B.D.S., M.D.S. (Gold Medalist) provides safe and advanced root canal treatment in Patna by using modern techniques. In this procedure, we carefully planned the process to remove the infected part inside the tooth, which is cleaned and sealed to stop the infection from coming back.

We focus on making the treatment comfortable and as painless as possible. At our clinic we make sure every patient gets a proper consultation and a treatment based on their dental condition, so they can heal faster and get better results.

A root canal treatment not only removes your pain but also helps you eat properly, speak clearly and smile with confidence again. If you ignore the dental infection, it can lead to bigger problems, so getting early treatment is always the best choice.

If you are looking for a trusted root canal treatment in Patna, consult Dr. Aishwarya today and protect your natural teeth with expert care.

Book an appointment today: (+91) 6307837576 and get relief from tooth pain
